Welcome to the July 2002 iSeries User Group Newsletter

\*\*\*\*\*

Meeting for July 10, 2002

\*\*\*\*\*

Who: Our July presentation will be given by Mark Sheffield & Nathan Revo from ICON Health & Fitness.

Mark Sheffield has been an Internet Programmer/Analyst with ICON since January 2001. He started as an RPG/CL programmer. Since then, he has moved to server-side Java programming, though he still works with legacy application on occasion.

Nathan Revo, another Internet Programmer/Analyst, started working with ICON in May of 2000 after consulting for a year. He has 4 years of web development experience with the last 2 devoted to server-side Java and WebSphere on the iSeries. He is currently certified in WebSphere Application Server V3.5, WAS V4.0 and VisualAge for Java V4.0.

What: ICON's experience with WebSphere products.

Topics will include:

- \* All the pieces
- \* The learning curve
- \* It's all about Java
- \* WebSphere Application Server
- \* VisualAge for Java
- \* WebSphere Commerce Suite V4.1
- \* Our 2-days with WebFacing
- \* The MVC pattern
- \* Future direction

When: Wednesday, July 10, 2002, 11:00am ? 12:20pm

Where: Murray City Building  
City Council Chambers  
5025 South State, SLC

\*\*\*\*\*

Upcoming Topics

\*\*\*\*\*

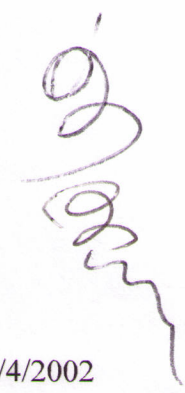

When: Wednesday, August 14, 2002 11:00am

Who: Ray Champlin from IBM

What: V5R2

Where: Murray City Building  
City Council Chambers  
5025 South State, SLC

M

7/4/2002

When: Wednesday, September 11,2002 11:00am  
Who: Kevin Peterson from SilverStream Software  
What: Web enable iSeries Applications and Data  
Where: Murray City Building  
City Council Chambers  
5025 South State, SLC

\*\*\*\*\*

Highlights

\*\*\*\*\*

A give away for those who attend!

Attending the iSeries Salt Lake User Group (iSLUG) Meetings became even more iProfitable!

As an added bonus, during each User Group Meeting, a gift certificate for dinner will be given away. You must be in attendance to win.

Also, the individual with the best attendance record for the year will receive one night stay at Utah's finest Bed and Breakfast ? WolfCrest located near the State Capital.

Your User Group Presidency:

President - Diane Burgener  
Tooele County  
435-843-3202  
[dburgener@co.tooele.ut.us](mailto:dburgener@co.tooele.ut.us)

Vice President - Gary Larson  
Lagoon Corporation  
801-451-8000 ext 3025  
[glarson@lagoonpark.com](mailto:glarson@lagoonpark.com)

Secretary - Brent Farr  
Symatrix Technology  
801-485-6281 ext 107  
[bfarr@symatrix.com](mailto:bfarr@symatrix.com)

Treasurer - John Dietz  
iAccess  
801-208-3282

3. iSeries - Executive Perspective - July 25 - 9AM (CC not yet available)

#### NEW REDBOOKS

Form Number: SG24-6587-00

Title: Deploying Lotus Sametime on the IBM eServer  
iSeries Server

Lotus Sametime is real-time collaboration software. It offers online awareness, instant messaging, application sharing, and virtual meetings all in one simple tool. Lotus Sametime helps organizations to be more responsive and more efficient by allowing employees, customers, partners, and suppliers to easily interact with one another in real-time.

Real-time collaboration is a natural extension to e-mail. It's not just about chat; it's about using the Web to improve customer service, reduce travel costs, and create communities among employees, customers, partners, and suppliers.

The IBM eServer iSeries server is an ideal platform for Sametime collaboration -- with an easy-to-manage infrastructure and low total cost of ownership. It shields the typical business user from worries about technical issues. The unique integrated architecture of iSeries delivers proven reliability, high availability, and powerful single-footprint scalability to customers, so they can focus on their business rather than technology.

This IBM Redbook targets systems administrators who plan to implement Sametime in their organization. It provides tips and techniques for successfully deploying and administering Sametime on a Domino for iSeries server.
