APRIL MEETING

Our April meeting is entitled "Disaster Recovery Planning - Method or Madness?" Charlie Fox, MIS Disaster Recovery Planning Coordinator for First Security Bank, will be the featured speaker. Charlie brings many years of experience and lots of ideas with him.

Please bring your questions and experiences to this interesting meeting which will be held at 11:00 am. on Wednesday, April 14th, at the Murray City Offices. We can all benefit from this topic and the input and experiences of others.

WE WILL ALSO BE TAKING NOMINATIONS FOR THE USERS GROUP OFFICERS FOR NEXT YEAR. Our annual election luncheon will be held in May. Be thinking of names, who knows, someone might be planning to nominate you.

MAR. MEETING

Our March meeting featured Bryan R Clark, a Corporate Systems Engineer, from Novell, Inc. Bryan's topic was NetWare for SAA.

"NetWare for SAA provides NetWare users with flexible, comprehensive IBM mainframe and AS/400 host connectivity. NetWare for SAA runs on a NetWare v3.1x or NetWare 4.0 server as a set of NetWare Loadable Modules (NLMs) in either of two configurations:

NetWare for SAA can run along with file services, print services, and any other NLM-based services on a single NetWare server.

Alternatively, NetWare for SAA can run on a NetWare server dedicated to communications (using NetWare Runtime).

The product supports numerous types of host connections, including Token Ring, Ethernet, Synchronous Data Link Control (SDLC), Qualified Logical Link Control (QLLC/X.25), or custom data link connections (such as FDDI, Channel Attached, or Asynchronous) available from third-party developers.

NetWare for SAA is available in configurations that support up to 508 display, printer, or APPC sessions." (NetWare Application Notes - January 1993.)

We thank Ken Morgan and the people at West Valley City for allowing us to meet at their facility.
